

Rev was invented by  
**Tamara Macharashvili**,  
a high school student  
from Tskaltubo, Georgia.

A high school senior with a passion for physics and math, Tamara is a science whiz who wants to be an engineer when she grows up. According to her, it only took 15 minutes to dream up Rev, which is pretty impressive considering she's only 17 years old. When she's not inventing, she's smokin' the competition in swim meets.

It all started with  
**Tamara's** render

Rev will be active for charging when plugged in.  
Note: Rev does not hold a charge when unplugged.

When charging, the LED light will flash evenly.  
When charge is complete, LED light will be on for 10 seconds, then turn off.

Rev will stop charging if mat becomes too hot and resume charging when temperature has returned to normal.

Rev will stop charging if a non-Qi compatible object is detected on the mat. Rev will automatically retry charging several times, then power off until the object is removed.
